# Result

**Reporting the findings of study**

**Presenting the result sequentially**

**Organizing the result properly**

**Interpreting the findings of study**

**Explaining the experimental setup/environment**

**Accurate calculation**

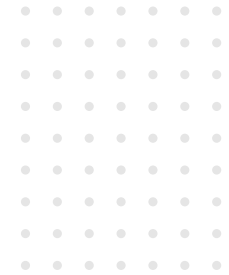

**Clear image captioning, Table arrangement**

**Interpreting all figures and tables**

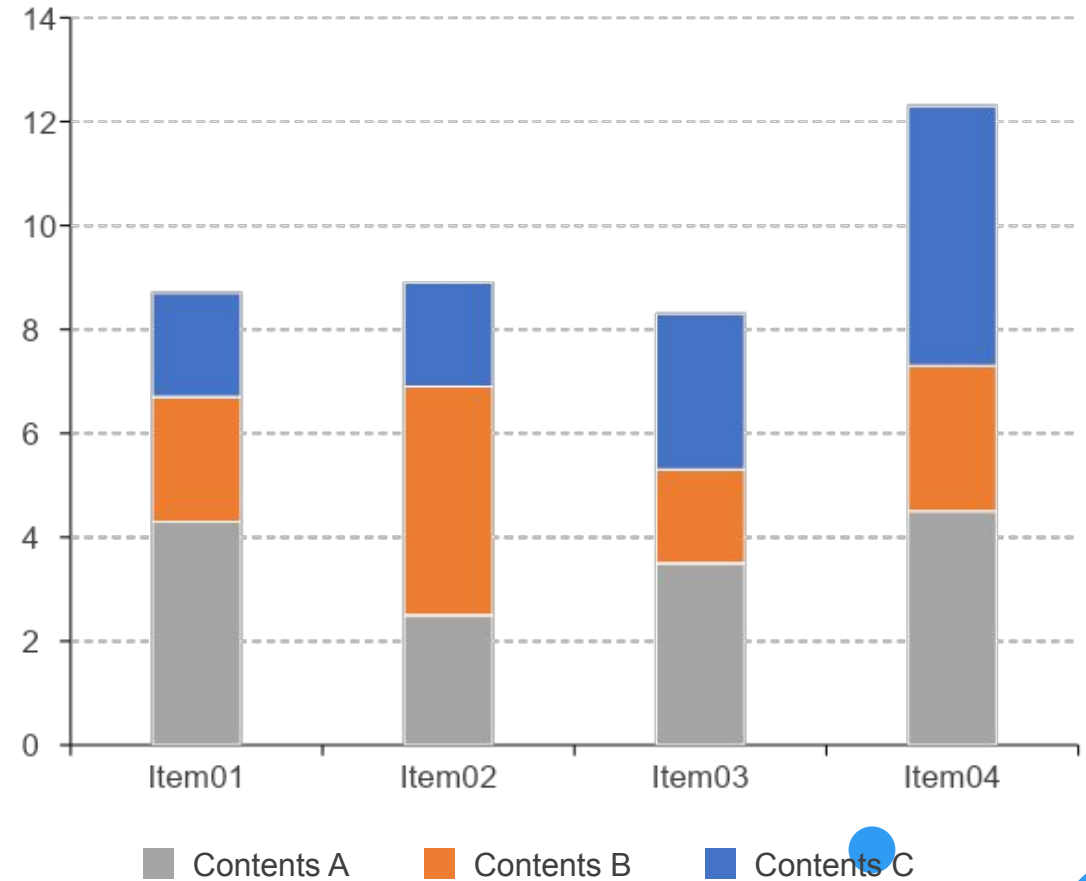

**Explaining how the result is improving the challenging task**

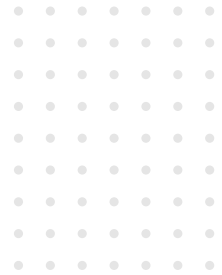

## What should be written?

- 1 Data presented in tables, charts, graphs, and other figures
- 2 A contextual analysis of this data explaining its meaning in sentence form
- 3 All data that corresponds to the central research question
- 4 All secondary findings (secondary outcomes, subgroup analyses, etc.)

let's see an example.....

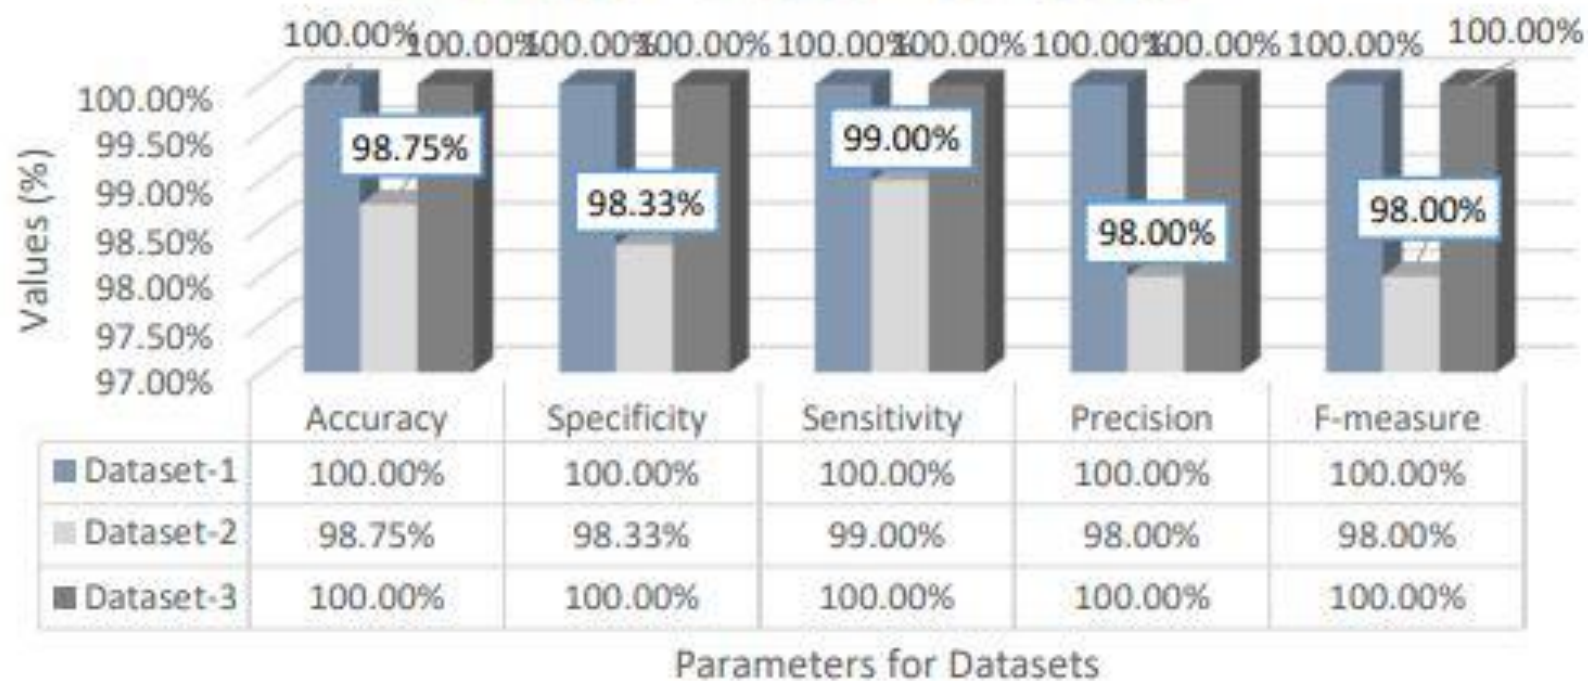

## Not to forget !!!

- 
- Presenting more than one result in one figure effectively
  - Writing “Result” part more concisely
  - Maintaining “Figure Quality”
  - Converting Table to Figure
  - How to minimize the number of Figures and Tables?

## Performace Evaluation Comparison
